

Breadboard electronic work parts set SBS-300BK

【Product Description】

This product is a set of books "light and sound breadboard electronic work that can be enjoyed", "SBS-203", "SBS-203-P01", "lead vendor RB-5", "tweezers", "dry batteries" All you need is one thing.

【set content】

Book (Japanese Language)	: Light and sound breadboard electronics that can be enjoyed
Electronic work set using timer IC555	: SBS-203
"Electronic work" additional parts	: SBS-203-P01
Lead vendor	: RB-5
	: tweezers
	: Batteries (4 AA)

【please note】

- General knowledge of electronic work and electronic circuits is required to use this product.
- Before using this product, be sure to refer to the book "Light and Sound Breadboard Electronic Crafting" published by the Tokyo Denki University Press.
- The parts included in this product (electrolytic capacitors, etc.) may differ from the rated voltage introduced in the book, but there is no problem with the operation of the circuit.
- Use parts that are sensitive to static electricity.
- One production example can be made at a time using the parts of this product.
If you make another production example at the same time, you may run out of parts.
To make another production example, remove all the parts from the completed production example and reuse the parts.
- Since the parts are reused, it is recommended to cut the lead of the parts a little longer with a margin.
