Universal board for Raspberry Pi
# UB-RPI01

【Main Specifications】
Size   : 55.4 × 56mm
Material and thickness : Double-sided / glass composite, 1.6t
Finishing process   : Through-hole gold flash, double-sided resist (black) / part side silk (yellow)
pattern   : 2.54mm pitch, dot pattern, hole diameter 0.9φ
Other   : Accessories Expansion connector P1 connector (13 pins x 2 rows)

【Product features】
・Compatible with Raspberry Pi Model A / B.

【Production example】

◆ Raspberry Pi experimental board

◎ **Explanation of production board**

This is a board to make Raspberry Pi easier to use.
Equipped with a DC jack for connecting an AC adapter
(5V), a power switch, a USB-serial conversion adapter for
a serial console, and a 13x2 row socket for connecting a
jump wire.

◎ **Used parts**

DC power conversion board (CK-23), USB-serial conversion
module (MM-FT232), resistor, electrolytic capacitor, LED,
toggle switch, 13 x 2 row socket, 7-pin right-angle pin
header
