

Magnetic guard T-160A

【Product features】

- Because it is a metal foil type that is not constrained by the shape of the object, it has excellent processability and can easily reduce the effects of noise.
- Excellent adhesion retention and excellent adhesion to a very wide range of adherends.
- Effective as a shield and filter to attenuate radiation and intrusion noise.

【Use】

- For noise prevention of cables and connectors
- For reducing radiation noise from coils and motors
- To reduce the effect of propagation from mobile phones

【Main Specifications】

Material	: Aluminum foil
size	: t0.08×160×210 (mm)
Adhesive strength	: 2,000g/20 (mm)
